### Highlights

- ✓ Completely open flow tube design: no moving parts, no strainer installation necessary, no maintenance required.
- ✓ Unaffected by presence of solids in the batch water.
- ✓ Standard "Turbo Meter" laying length eliminates the need of special piping arrangements.
- ✓ Accuracy:  $\pm 0.5\%$  of actual flow.
- ✓ Two Built-in pulse outputs: DC open collector, and solid state relay. Compatible with your existing 110 VAC pulse batch controller.
- ✓ Built-in rotary switches for easy batch calibration.
- ✓ Consistent performance in quality.
