

# MEASURE RITE®

## Volumetric Truck Meter

3/4 , 1 , 1½ & 2

BadgerMeter, Inc.

### Description:

The **MEASURE RITE® Volumetric Truck Meter** is designed specifically for measuring and dispensing water for premixed batches at the job-site. This rugged, truck-mount unit allows the user to accurately totalize the amount of water added, depending on slump requirements. The unit meets the requirements for specified truck meter accuracy and calibration procedures (in compliance with ALDOT-407-01).

### Features:

- Powered directly from truck wiring, or any 9-36 Volt DC power supply.
- Stays activated as long as there is power.
- Single-button operation for both Zero Re-Set and Calibration.
- Withstands direct hose-spray washdown.
- Calibration is done in “Pounds” for easy reference to the above ALDOT procedure.
- Rugged meter body and electronics housing.
- Sealed housing, window and push-button.
- Resists vibration damage associated with truck-mounting.
- Resists damage caused by sudden “air-slug flow.”
